

OpenRouter Provider Revenue — 2026-05-13

UTC: 2026-05-13T00:00:00+00:00 to 2026-05-13T23:59:59+00:00; baseline: prior day 2026-05-12

Snapshots	Providers	Weekly Tokens	Weekly Revenue	Annualized
4	59	23.55T	\$25.87M	\$1.35B

Revenue trend — top 8 providers (2026-04-22 → 2026-05-13)

Weekly revenue (rolling 7d) across 10 snapshots. X-axis is proportional to real time — visible horizontal gaps reveal collection outages.

Top 25 Providers (vs baseline)

#	Provider	Rev/wk	Share%	Δshare pp	Prev#	Top model	Top rev
1	Amazon Bedrock	\$11.36M	43.90	-3.30	1	Anthropic: Claude Opus 4.7	\$5.93M

Z.AI	-0.27	0.66%	12→14	\$169.8K

New Entrants (not in baseline)

Provider	Rank	Share%	Revenue	Top model
Featherless	59	0.00%	\$0	AlfredPros: CodeLLaMa 7B Instr

Methodology: hourly snapshots of OpenRouter `/api/frontend/stats/endpoint` provide per-(model, provider) request-count distribution. Global weekly tokens per model (from OpenRouter's public model catalog) are allocated proportionally to each provider. Revenue = tokens × (0.9·input_price·0.5 + 0.1·output_price). Shares are of total allocated revenue across the tracked universe.
